

WARNING TOILET AUGER SAFETY

Any piece of equipment can be dangerous if not operated properly. **YOU** are responsible for the safe operation of this equipment. The operator must carefully read and follow any warnings, safety signs and instructions provided with or located on the equipment. Do not remove, defeat, deface or render inoperable any of the safety devices or warnings on this equipment. If any safety devices or warnings have been removed, defeated, defaced or rendered inoperable, **DO NOT USE THIS EQUIPMENT!!!**

⚠ WARNING: This product can expose you to chemicals including naphthalene and chromium from petroleum products used on the cable which are known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to www.P65warnings.ca.gov

If the person receiving this handout will not be the user of the equipment, forward these instructions to the operator. If there is any doubt as to the operation or safety of the equipment,

DO NOT USE!!! CALL A TOOL SHED IMMEDIATELY!!!

FAILURE TO FOLLOW THESE INSTRUCTIONS COULD RESULT IN INJURY OR DEATH

FEATURES

Flexicore® Closet Auger (3FL)

Teletube® Closet Auger (T6FL-DH shown)

OPERATION

1. Pull the handle out of the tube until the boring head is touching the tube. Insert tube into the toilet

2. While turning the handle clockwise, push rod downward until the obstruction is either forced down the waste line or is caught by the boring head.

3. **IF USING TELETUBE CLOSET AUGER:** If the stoppage has not been reached, push the button located just above the grip handle, and pull back on the turning handle to release three more feet of cable, then repeat the above steps.

4. When the boring head catches the obstruction, pull back on the turning handle while holding down the tube.

5. It is sometimes necessary to reverse rotation of the snake in order to work it through the bowl. If the head gets caught, pull back and start again.

DO NOT FORCE CABLE. FORCING CABLE MAY CAUSE KINKING OR BREAKAGE.
